1.0 Context of the assessment

This assessment was conducted after the Agency's Procedures for the Prevention of Bribery and Corruption were approved (Board Resolution DASA/BD/RES/2026/031) and as a precondition for the FY 2026/2027 corruption prevention performance contract indicator. Demand for appointments exceeded daily capacity by an estimated 35% during FY 2025/2026, and three public complaints alleged queue-jumping at the headquarters service hall.

2.0 Scope: core and support functions

Category	Functional areas assessed
Core mandate	Appointment scheduling and allocation; appointment rescheduling and cancellation; applicant verification; records and certificate issuance; complaints and customer feedback.
Support services	Procurement approvals; human resource (recruitment); finance (payments); ICT (booking-system administration); stores and assets.

3.0 Methodology

The IAO Committee reviewed process maps, interviewed 31 staff across the ten functional areas, examined complaints and audit reports for FY 2025/2026 and held two validation workshops with heads of department. Each risk is scored on the declared 1-5 scales below; severity score = Probability x Impact (1-25).

Score	Probability (Pr)	Impact (Im)
1	Rare - not expected in the year	Negligible - no service or reputational effect
2	Unlikely - could occur once in the year	Minor - isolated, quickly corrected
3	Possible - may occur a few times	Moderate - service quality or fairness affected
4	Likely - occurs regularly	Major - systemic unfairness, financial loss or media attention
5	Almost certain - occurs frequently	Severe - widespread loss of public trust or legal liability

Severity bands: High 15-25; Medium 6-12; Low 1-5.

4.0 Risk register (Appendix III(a): Corruption Risk Assessment)

Name of Institution: **Demo Appointments Service Agency** FY: **2026/2027** Corruption Risk Assessment

S. No	Functional area	Identified corruption risk (what could go wrong)	Risk source (why would the risk event occur)	Pr (1-5)	Im (1-5)	Score (Pr x Im)	Band	Existing controls
R-01	Appointment scheduling and allocation (Core)	Discretionary allocation of appointments: slots allocated in exchange for a bribe, favour or personal relationship (queue-jumping).	Manual allocation by desk clerks; no audit trail of who allocated which slot; unpublished queue; demand exceeds daily capacity.	4	5	20	High	Supervisor signs daily paper list (does not show overrides or reasons).

Low (1-5)	-	0

6.0 Assessment of existing controls

Existing controls for R-01 and R-03 rely on paper lists and counts that do not show who allocated or released a slot, nor why; they cannot detect queue-jumping. For R-02, approvals of low-value procurements rest with a single officer and are only examined in the annual audit, so irregular approvals may go undetected for up to a year. Controls for the medium risks are largely system-enforced (IFMIS, e-procurement, checklists) and are rated adequate subject to staff awareness of the new Procedures.

7.0 Recommendations to the Mitigation Plan

- Digitise allocation, rescheduling and cancellation through a controlled allocation register with mandatory reason codes and a quarterly exception review (treats R-01, R-03 and R-09).
- Introduce an independent quarterly spot-check of a sample of at least ten procurement approvals (treats R-02).
- Train allocation-desk and procurement-approval staff on the Procedures in Q1 (treats R-01 and R-02).
- Continue existing controls for R-04 to R-08 and R-10 and monitor them at each quarterly CPC meeting.
- Hold quarterly IAO Committee and CPC meetings to track implementation and approve reports to the Commission.
